Re: Soil storage at Heber quarry

Lynn: I have includes a map to show the proposed fill site.

The amount of fill is to be approximately 40,000 yds..

The type of material is not known, but is expected to be a granular fill, it now is under the highway to support the road.

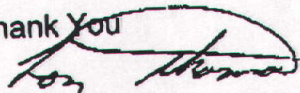

We will strip all of the topsoil off of the area first, and push it into a pile.

There will not be any asphalt dumped, it is going to be rotomilled first, and the state has another use for it.

I will make it part of the contractors responsibility to make the county happy and supply whatever permits and bonds that they will require, before they will be permitted to start their process.

Please feel free to call , Jim Matthews or Lon Thomas if you have any Questions. 801- 262-4300 to contact either one of us.

Thank You

Lon Thomas
